# Summary

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like "Huardest gefburn"? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

## Statement of Authorship

I, the undersigned, hereby certify that I have compiled and written the attached document and the underlying work without assistance from anyone except the specifically assigned academic supervisors and examinors. This work is solely my own, and I am solely responsible for the content, organization, and making of this document.

I hereby acknowledge that I have read the instructions for preparation and submission of documents provided by my course/my academic institution, and I understand that this document will not be accepted for evaluation or for the award of academic credits if it is determined that it has not been prepared in compliance with those instructions and this statement of authenticity.

I further certify that I did not commit plagiarism, did neither take over nor paraphrase (digital or printed, translated or original) material (e.g. ideas, data, pieces of text, figures, diagrams, tables, recordings, videos, code, ...) produced by others without correct and complete citation and correct and complete reference of the source(s). I understand that this document and the underlying work will not be accepted for evaluation or for the award of academic credits if it is determined that it embodies plagiarism.

Is there no information? Is there a difference between this text and some nonsense like "Huardest gefburn"? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

### 1.2.1 Subsubchapter 1

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like "Huardest

gefburn"? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

### 1.2.2   Subsubchapter 2

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like "Huardest gefburn"? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

## 2 Template functionality

### 2.1 Referencing

This template implements the "Plain Harvard" style of referencing. This is a sentence with a reference. (Guthrie, 2012)

References are stored in the references.bib file.

### 2.2 Glossary and Abbreviations

The template has support for a list of Abb. and a glossary. Both can be linked to specific words of a Sentence.

### 2.3 And more

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like "Huardest gefburn"? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.
